

## SpiriTac Film SA 190

— glossy 3675 - 190 µm

Clear microporous SuperDry inkjet coated polyester film with a self-adhesive backing, which is covered with a PP release liner. After dry application onto glass or acrylic glass the film can be removed without leaving residue.

### Applications

- High quality photo reproduction
- Indoor signs
- City Light Posters / Outdoor light box displays

### Advantages

- Brilliant colours for GA and high density
- Quick Dry
- High transparency
- Good adherent, but easy to remove

## SpiriTac Film SA 190

— glossy 3675 - 190 µm

### Physical Properties

Weight (Total) [gsm]	230 g/m <sup>2</sup>	ISO 536
Thickness (total) [microns]	190 µm	ISO 534
Transparency [%]	87%	DIN 53 147
Adhesion Strength Glas [N/25mm]	0,45 N/25mm	FTM 1 (24h)
Adhesion Strength on acrylic glas [N/25mm]	0,35 N/25mm	FTM 1 (24h)

### Conditions of Use

For quality reasons the film should be stored and converted under conditions of 30-65% relative humidity and at a temperature of 10-30°C.

The film is optimized for dry application, but can be applied as well wet. For that reason we recommend strongly to laminate the print / the surface with a pressure sensitive over laminate. If the film is applied wet, the film can leave some residues on the surface after removing it. These residues can be cleaned easily with Isopropanol or Aceton.

The values provided on this datasheet are only for orientation.

Before using our media please check its compatibility for your printer and intended application. Technical specifications are subject to change, therefore we do not take responsibility for any misprints resulting from technically modified inks and/or printers.
